

Customer Data Export and Privacy Request Policy

Scope: This document applies when a customer requests personal data export, account data deletion, privacy setting changes, authorization revocation, or data retention clarification.

Handling rules:

1. Support must verify customer identity and account ownership before processing deletion.
2. Data export requests are normally processed within 3 to 7 business days.
3. Completed deletion may be irreversible, so the customer must confirm the impact scope.
4. Enterprise workspace data deletion requires workspace admin or contract owner approval.
5. Legal, regulatory, or cross-border data questions must be escalated to the privacy compliance team.

Suggested reply: We have received your privacy or data request. To protect your account, we need to complete identity and permission verification first. After verification, data export is usually processed within 3 to 7 business days. Enterprise workspace or compliance review cases may require additional time.
